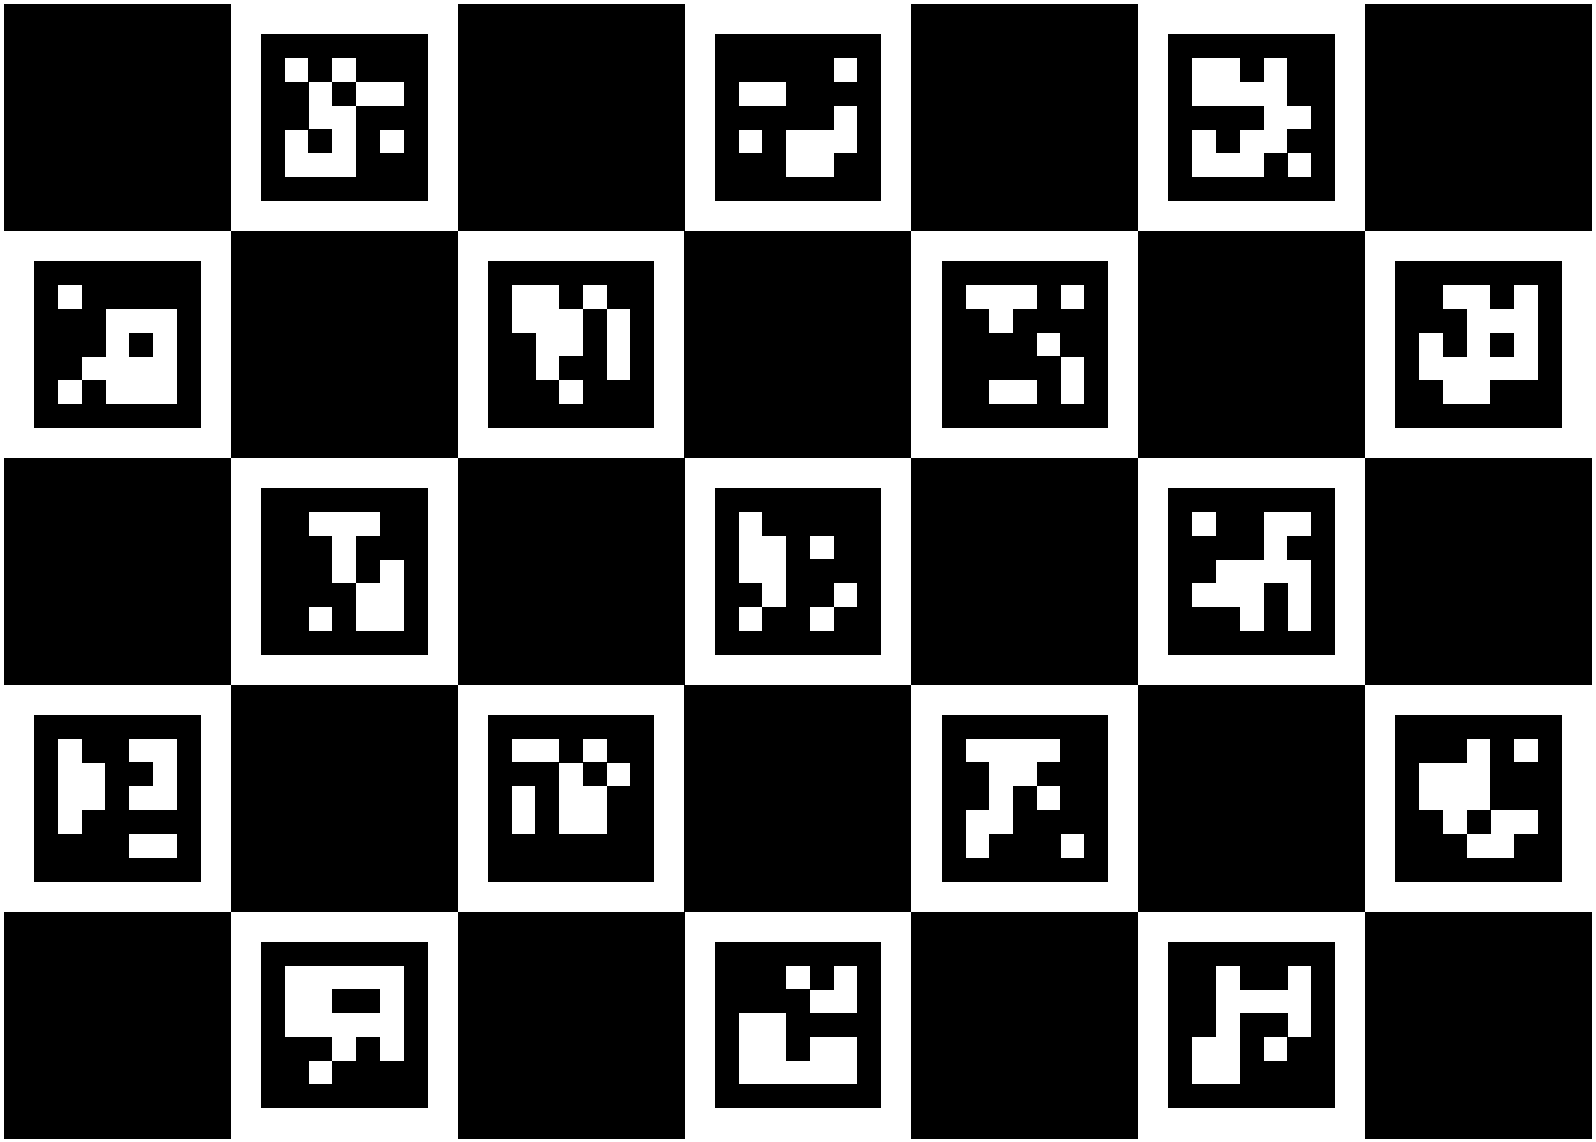
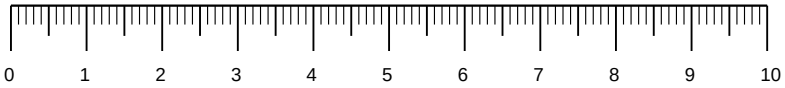
Drystone calibration board: ChArUco 7x5, squares 30 mm, markers 22 mm, DICT_5X5_100

Print at 100% (Actual size). Do not fit to page.



Mount on a rigid, flat board. Measure a square and pass it as --square-mm.

e.g. python tools/calibrate.py --name laptop --square-mm 29.8 --auto



100 mm (cm marks). Measure it: it must be 100 mm.
