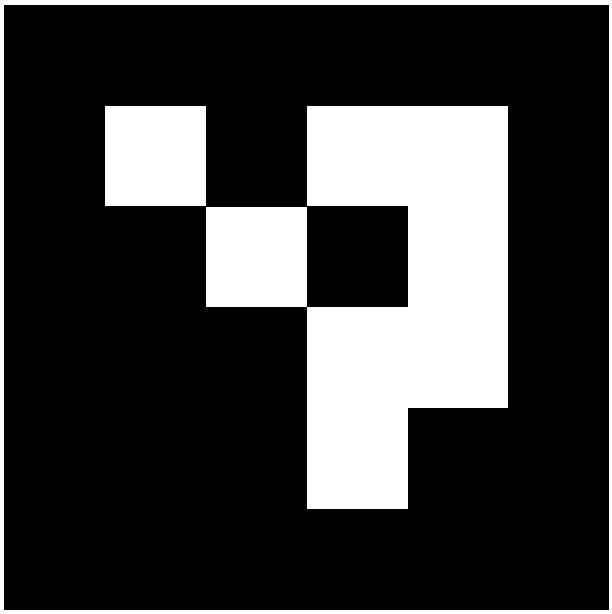
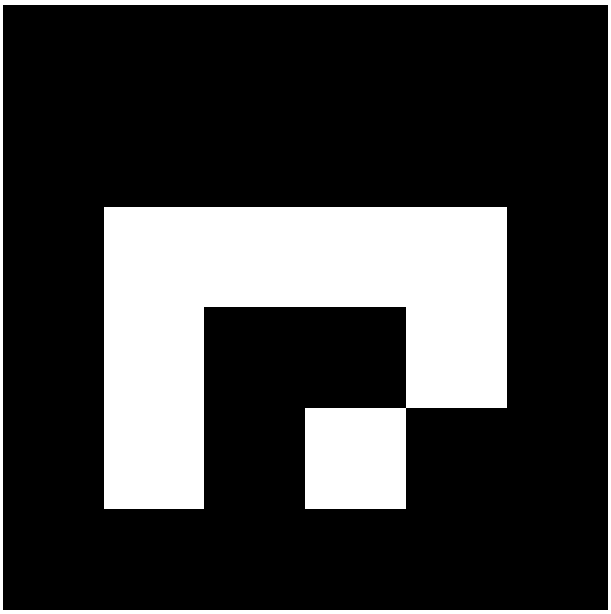
Drystone box markers: ArUco DICT_4X4_50, black square exactly 80 mm

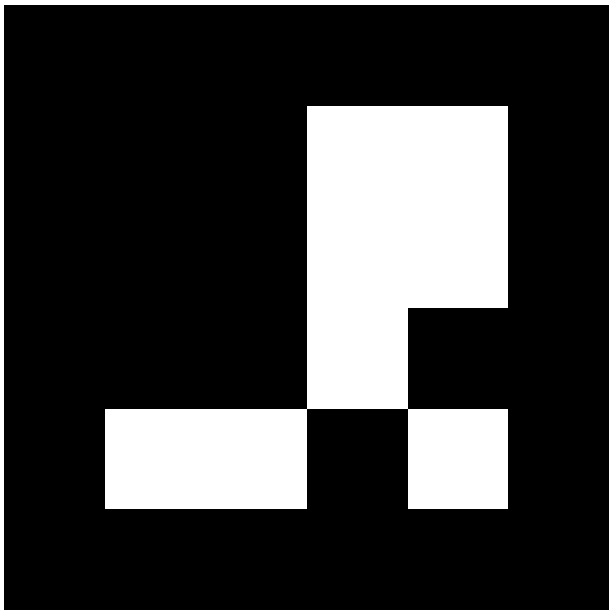
Print at 100% (Actual size). Do not fit to page.



ID 0 · 80 mm



ID 1 · 80 mm



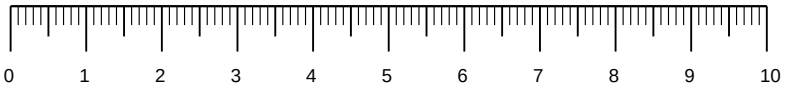
ID 2 · 80 mm

Cut along the dashed lines. Keep the white border: the camera needs it to find the marker.

Stick one marker in the middle of the front face of each box, flat and straight:
ID 0 on the bottom box, then ID 1, ID 2.

Measure the black square of one printed marker and pass it to the agent, e.g.
`python tools/agent.py --marker-mm 80`

Box sizes and weights per ID go in config/boxes.json.



100 mm (cm marks). Measure it: it must be 100 mm.

Print at 100% (Actual size). Do not fit to page.
